

**6100, 6150
56100, 56150**

These perforated supply ceiling diffusers feature a neck mounted rotatable core with either a round or square neck. Aluminum or steel perforated face is available.

**6200, 56200
6200FR, 6290F**

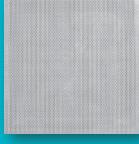

These perforated supply, ceiling diffusers feature neck mounted curved blades with a square neck. Aluminum or steel perforated face is available. Fire rated or filter return variations available.

**6500, 56500
6500FR, 6590FR**

These perforated supply, ceiling diffusers feature neck mounted curved blades with a round neck. Aluminum or steel perforated face is available. Fire rated supply and return variations available.

**6300**

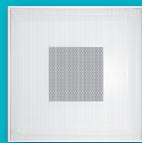

This perforated supply, ceiling diffuser features face mounted deflectors and a prescored fiberglass backpan for field cutting. Available in steel construction only.

**6390**

This perforated return features a prescored fiberglass backpan for field cutting. Available in steel construction only.

6400, 56400, 6400FR
These perforated supply ceiling diffusers feature face mounted deflectors with a square neck. Aluminum or steel perforated face as well as a fire rated variations are available.

**6490, 56490**

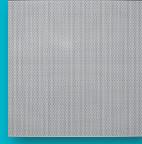

These perforated ceiling returns feature a square neck. Aluminum or steel perforated face is available.

**6600, 56600, 6600FR**

These perforated supply ceiling diffusers feature face mounted deflectors with a round neck. Aluminum or steel perforated face is available. A fire rated variation is also available.

**6690, 56690**

These perforated ceiling returns feature a round neck. Aluminum or steel perforated face is available.

**6790, 56790**

These aluminum or steel perforated screen ceiling panels with no backpan are great for non-ducted return or exhaust applications.

**1100, 51100**

These architectural, perforated, supply ceiling diffusers feature neck mounted curved blades with a square or rectangular neck. Available in steel or aluminum construction. A metric version is also available.

**1190, 51190**

These architectural, perforated, ceiling returns feature a square or rectangular neck. Available in steel or aluminum construction.

Introduction: 1100, 1190 Series

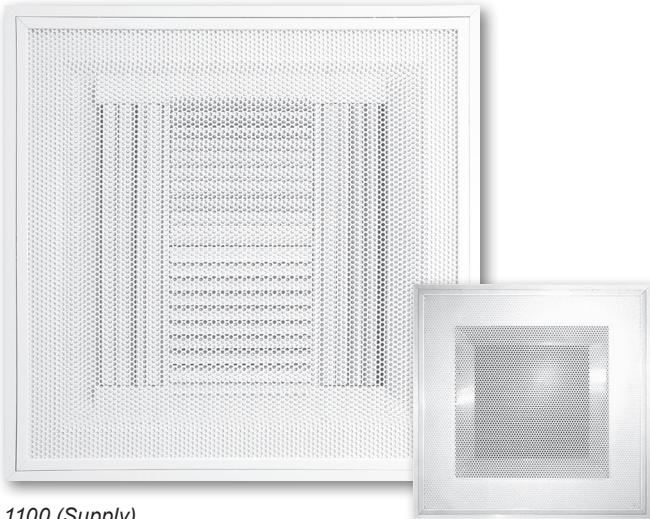

The 1100/51100 series architectural, perforated diffusers use curved blade-type pattern deflectors mounted in the neck and are available in preselected 1, 2, 3, or 4-way discharge air patterns. Individually adjustable curved blades allow field adjustment of the air pattern in each direction, which may be field set to any position between a vertical throw and a tight ceiling, long horizontal throw pattern. The pattern deflectors in the neck create aspiration of secondary air through the perforated face where it is mixed with primary air then discharged through the perforated face. This aspiration and mixing effect reduces the discharge air temperature to avoid cold air drafts. Additionally, it removes smudging material from the secondary air by impingement on the perforated face. Ceiling smudging of adjacent, hard to clean ceiling surfaces is greatly reduced. The 1100/51100 series diffusers exhibit typical isothermal throws of 10' to 18' for 4-way air distribution and 21' to 35' for 1-way air distribution making this diffuser an excellent choice for irregular room shapes. Matching returns are the 1190 and 51190 series.

MODELS

- 1100 - Steel Backpan with Aluminum Frame, Steel Perforated Face with Aluminum Frame Supply Diffuser
- 1190 - Steel Backpan with Aluminum Frame, Steel Perforated Face with Aluminum Frame Return
- 51100 - Aluminum Backpan with Aluminum Frame, Aluminum Perforated Face with Aluminum Frame Supply Diffuser
- 51190 - Aluminum Backpan with Aluminum Frame, Aluminum Perforated Face with Aluminum Frame Return

PANEL SIZES

- 12"x12" • 12"x24"
- 24"x24" • 24"x48"

1100 (Supply)

1190 (Return)

FEATURES

- Square or rectangular necks.
- Architectural extruded aluminum borders.
- Individually adjustable blade pattern deflectors for horizontal to vertical throw.
- Variety of discharge air patterns available.
- Removable perforated face and core for ease of cleaning.

ACCESSORIES

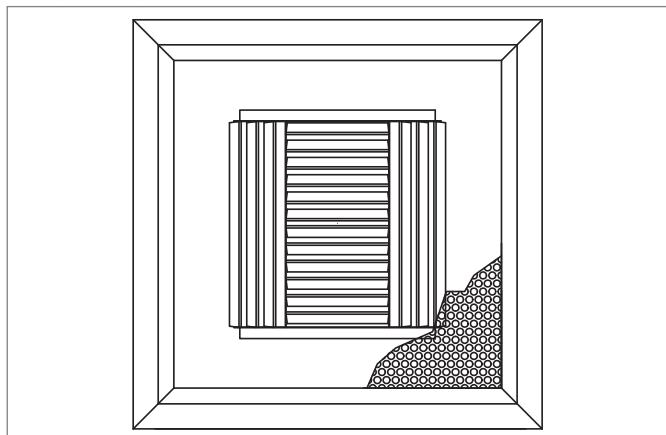

- Optional Opposed Blade Damper (Model OBD)
- Optional Straightening Grid

FINISHES

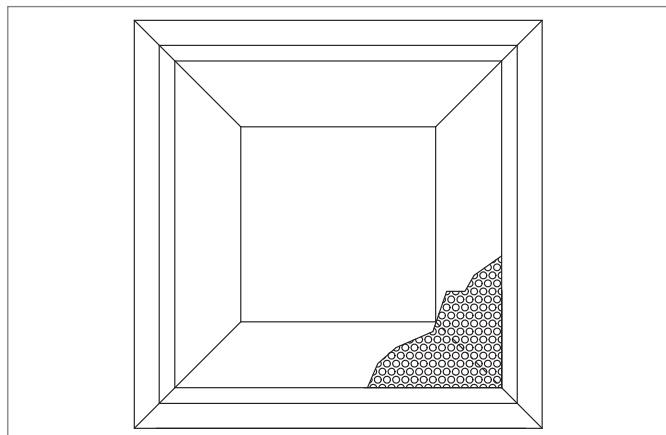

- Standard finish is #44 British White.
- Optional finishes available.

NOTES: SUPPLY

Throw values are given for terminal velocities of 150, 100, and 50 FPM (0.75, 0.5, and 0.25 m/s). Throw values are given for isothermal conditions. Dash in space denotes NC or dB value of less than 10. NC values are based on octave band, 2 - 7 sound power levels minus a room absorption of 10dB, re 10⁻¹² Watts. Data was obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70, ISO Standard 5219, and ISO Standard 3741. The throw values given for 1-Way Throw is for [Total CFM] CFM per side (L/s). The throw values given for 2-Way Throw is for [Total CFM/2] CFM per side (L/s). The throw values given for 3-Way Throw is for [Total CFM/3] CFM per side (L/s). The throw values given for 4-Way Throw is for [Total CFM/4] CFM per side (L/s). See Krueger's selection software for performance data not shown, including octave band data.

NOTES: RETURN

NC values are based on octave band 2 - 7 sound power levels minus a room absorption of 10dB, re 10⁻¹² Watts. Dash in space denotes NC or dB value of less than 10. Data was obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70, ISO Standard 5219, and ISO Standard 3741. See Krueger's selection software for performance data not shown, including octave band data.

1190, 51190 (Return) Suggested Specification & Configuration**1190, 51190**

The perforated face return diffuser shall be Krueger model 1190 (steel perforated face and backpan) or 51190 (aluminum perforated face and backpan). The diffusers shall have a perforated face with 3/16" diameter holes on 1/4" centers resulting in a 51% free area. The perimeter of the perforated face and backpan shall be an aluminum extrusion resulting in an aesthetic appearance. The diffuser shall have a tapered backpan made up of four individual pieces resulting in a square neck.

The perforated face must be easily removable from the backpan for access to the damper.

Optional opposed-blade damper (OBD) shall be constructed of heavy gage steel. Damper shall be operable from the face of the diffuser.

PERFORMANCE

The manufacturer shall provide published (printed or electronic) performance data for the diffuser. Performance data shall include 2 - 7 octave band sound power levels. The diffuser shall be tested in accordance to the data standards at the time of product introduction or ANSI/ASHRAE Standard 70.

FINISH

The paint finish shall be #44 British White and be an anodic acrylic paint, baked at 315°F for 30 minutes. The paint thickness shall be 0.8 – 1.0 mils, gloss at 60° per ASTM D523-89 of 50 – 85%, pencil hardness per ASTM D3363-92A of HB – H, crosshatch adhesion per ASTM D3359-83 of 4B – 5B, impact per ASTM D2794-93 of direct impact >100 in/lb and reverse impact >80 in/lb, salt spray per ASTM B117-9048 of 96 hours, humidity per ASTM D2247-92 of >500 hours and water soak per ASTM D870-92 of 250 hours.
