

HVAC CONTROLS

for system integrators

neptronic[®]

neptronic.com

Proven integration with

Overview

Neptronic features a wide range of BTL listed BACnet MS/TP or Modbus networked controllers that have proven integration with several BMS systems on multiple sites around the world. Neptronic networkable controllers offer flexibility and simplicity within any integration strategy to provide:

- ▶ Seamless integration and interoperability
- ▶ Real-time information management and control
- ▶ Lower costs and higher value
- ▶ Diverse control strategies
- ▶ Higher energy conservation

Save Time On Integration, Installation and Commissioning

Neptronic networkable controllers feature some or all of the following features and benefits.

Two MAC Address Configuration Methods

Set MAC address via user friendly menu on thermostat or locally on unit via DIP switches.

Firmware Upgrade via BACnet

Upgrade the device in the field via BACnet. Initiate the upgrade during normal operation and choose when to restart the system.

Auto Configuration and Detection

The controller automatically configures its device instance to a default value + MAC address. The controller automatically configures its baud rate by detecting the network speed upon connection.

Programming Schedules

Determine occupancy in advance for 7 days with up to 6 events per day. Avoid constant monitoring and save energy.

Copy Configuration

Copy the controller's entire configuration and broadcast it to other controllers of the same type on the same network.

Automatic Update of Changed Values

Enable subscription to update changed values automatically. Avoid regular polling of values, reduce traffic and transmit faster.

BACnet Objects

Multiple BACnet Objects per controller enable you to read/write information as you monitor and trend status of operation, alarms and schedules.

Service Display

If you are searching for a specific device, enabling the service mode will flash the device to easily locate the device

Controller (EFCB)

- Real Time Clock (RTC) with 24 hour backup
- Configurable PI (Proportional-Integral) function
- Selectable proportional control band and dead band
- Independent cool/heat setpoint for NSB/OCC mode
- Selectable internal or external temperature sensor (10KΩ)
- Change over by contact or external temperature sensor
- Freeze protection
- BACnet MS/TP or Modbus communication (selectable)
- BACnet scheduler
- Firmware upgradeable via BACnet

Applications

- Fan Coil Units
- 2 pipes or 4 pipes

Universal Digital Room Sensor (TDU)

- Built-in temperature sensor and optional humidity and CO2 sensors (see selected models)
- Built-in light level sensor
- Optional PIR motion detection sensor
- 3.5" LCD display
- Slim design
- Universal wall-mount design
- Used to configure and operate the EVCB VAV controllers and EFCB Fan Coil controllers
- Selectable internal or external temperature sensor (10 KΩ)
- Three wire connection between thermostat and controller
- Selectable Fahrenheit or Celsius scale
- Network service port via on-board mini USB connector
- Approximate size 127mm x 82mm x 15mm (5" x 3.25" x 0.6")

Digital Room Sensor (TFL)

- Backlit LCD with simple icon and text driven menus
- Select thermostat's default display
- BACnet service port via on-board mini USB connector
- Selectable Fahrenheit or Celsius scale
- Manual night set back or no occupancy override
- Multi level lockable access menu
- 3-wire connection to controllers
- Used to configure and operate EFCB Fan Coil Controllers

TFCB24 & TFHB24

Fan Coil Wall Mount Controller

BACnet™

Combination fan coil controller and room thermostat.
Run control wires directly to TFC unit.

Inputs

Main Features

- Applications: Fan coil units (2 or 4 pipes)
- Precise temperature control with programmable PI function
- Selectable internal or external temperature sensor
- Changeover by contact or external temperature sensor
- Freeze protection
- BACnet communication
- External humidity sensor (select models)
- Dehumidification sequence (select models)
- Backlit LCD with simple icon and text driven menus
- Selectable Fahrenheit or Celsius scale
- Manual no occupancy override
- Multi level lockable access menu

TFC54 & CCC

Fan Coil Wall Mount Controller

Stand-Alone Models (TFC54)

Model	On-off (TRIAC)	Analog (0-10Vdc)
TFC54F3Y1	Yes	-
TFC54F3X1	-	Yes

Main Features

- Configurable inputs and outputs:
 - 2 TRIAC outputs or 2 analog outputs (depends on model)
 - 3 fan speed digital outputs (dry contacts)
 - 2 inputs
- Selectable internal or external temperature sensor
- Changeover by contact or external temperature sensor
- Selectable proportional control band and dead band
- 24Vac operation
- Selectable Fahrenheit or Celsius scale
- Manual night set back override
- Multi level lockable access menu

Relay Interface Board (CCC)

- 240/120 Vac
- 3, 4 or 5 contacts, 7A
- Also available in a metal box with secure 4-point mounting
- LED indication of relay status
- Fused 240/120 Vac & 24 Vac circuits

Inputs

DI2
2 Digital
(occ sensor)

24 Vac

Outputs

*Configurable

Controller (EVCB)

- Built-in actuator, 70 in.lb. (8Nm) (select models)
- On board differential pressure sensor (select models)
- Simple air balancing and commissioning via thermostat
- Automatically sets operation mode to pressure dependent or independent based on the presence of air flow
- Configurable PI (Proportional-Integral) function
- Independent, configurable proportional control band and dead band per ramp
- Selectable internal or external temperature sensor (10KΩ)
- Thermostat with on-board CO₂ sensor or external CO₂ sensor with integrated logic
- Changeover by contact or external temperature sensor
- Potentiometer feedback for increased precision of actuator position (select models)
- Real time clock (RTC) with 24-hour backup
- BACnet MS/TP or Modbus communication (selectable)

- Changeover by contact or external temperature sensor
- Freeze protection
- Backlit LCD with simple icon and text driven menus
- Selectable Fahrenheit or Celsius scale
- Manual Night set back override
- Multi level lockable access menu and setpoint

Main Features

- 24Vac operation
- Backlit LCD with simple icon and text driven menus
- Selectable Fahrenheit or Celsius scale
- "Night Set Back" mode with manual override
- Multi level lockable access menu and setpoint
- Selectable internal or external temperature sensor
- Selectable proportional control band

TUCB/TUHB

Universal Wall Mount Controller

-  Packaged AC Rooftop Units
-  Heat Pumps
-  Fan Coils

Wall Mount Universal Controller

Combination controller and room thermostat.
Run control wires directly to TUCB unit.

Models

Model	DI*	AI*	BO*	AO*	Sensor
TUCB24C6X2	2	2	6	2	Temp.
TUHB24C6X2	2	2	6	2	Temp. / Hum.

*fully configurable for universal applications

Universal Applications

- Heat pumps
- Packaged AC rooftop units
- Fan coils
- Humidity control
- CO₂ alarms
- Other heating/cooling equipment

Inputs

DI2	AI1	
2 Digital	1 Analog*	24 Vac

Outputs

BO6	AO2	
6 Digital*	2 Analog*	1, 2 or 3* Speed (BO3-BO6) or ECM (AO2)

Communication

BAC	Mod
BACnet MS/TP	Modbus RTU Slave

*Configurable

Main Features

- Applications: Heat pump, humidity control, CO₂ alarms, or general unit controller
- Precise temperature control with programmable PI function
- Selectable internal or external temperature sensor
- External humidity sensor input
- Built-in humidity sensor (TUHB models only)
- Dehumidification sequence compensated by auto activation of reheat output
- Changeover by contact or external temperature sensor
- Compressor anti-cycling delay (configurable)
- Low limit set protection (10°C/50°F)
- Freeze protection
- Occupancy and Night Set Back (NSB) mode
- Real time clock (RTC) with 24-hour backup
- BACnet MS/TP or Modbus communication (selectable)
- 7-day BACnet schedule
- Backlit LCD with simple icon and text driven menus
- Selectable Fahrenheit or Celsius scale
- Manual no occupancy override
- Multi level lockable access menu and setpoint

ARO/AROB

*Configurable

Main Features

- Built-in application profiles to automatically configure the controller for the selected application.
- Up to 4 simultaneous control loops capable of controlling, in real time:
 - Humidification and Dehumidification
 - Heating and Cooling
 - CO₂ levels
 - VOC levels
- Integrated ECM fan control mode
- Displays temperature, %RH, CO₂, VOC, and setpoints
- Display or hide all the required access for user interaction
- Backlit LCD with simple icon and text-driven menus
- Selectable Fahrenheit or Celsius scale
- Precise temperature control with programmable P function
- Independent cool and heat setpoint for No Occupancy
- Configurable proportional control band and dead band

HROB20

Humidity Control Wall Mount Controller

Wall Mount Humidity Controller

Combination controller and room humidistat.
Run control wires directly to HROB unit.

Applications

- Neptronic SKR, SK300, SKE, and SKG humidifiers
- Other humidification and dehumidification applications

Ramps

- **LSS: External Demand Low Signal Selector**
Compares selected input signals to select the lowest signal.
- **AER: External Humidity Sensor Averaging**
Calculates an average of selected input signals
- **DUC: Duct Supply Input**
Two PID loops and a zero/span to smooth out the demand signal
- **DED: External Demand Signal**
Control using an external demand of 0-10Vdc or 2-10Vdc
- **HIL: High limit**
Compares the demand of the room humidity PID loop with the duct/high limit PID loop and applies the lower of the two.

Main Features

- BACnet MS/TP (stand-alone model HRO20 also available)
- 4 analog outputs and 2 dry contact outputs
- External humidity sensor input
- Window or external temperature sensor input
- Alarm status and low signal selector input
- Independently configure PID on humidify & dehumidify ramps
- Adjustable setpoint with auto reset from external sensor
- Multi level lockable access menu, setpoint and control mode
- Backlit LCD with simple icon and text driven menus
- Selectable Celsius or Fahrenheit scale
- Humidification and dehumidification indicator

Dual Pro I/O Board

Input and output expansion board (CMMB)

Models

Type	Model	Buttons	Inputs	Outputs
Exp. Board	CMMB106	-	10	10
Thermostat	STLD24A	Fan & heat-cool	1	-
Thermostat	STLD24B	Fan & °F/°C	1	-

Applications

The CMMB series extends your BACnet or Modbus network when your application requires additional inputs and outputs on a physical controller. The CMMB provides simple expansion of a new or existing controller and reduces unnecessary costs of additional components.

Connected directly to the CMMB106 via Modbus, the STLD24 Modbus RTU LCD Thermostat provides internal and external temperature sensors, LCD display and operational commands without using up a BACnet address.

CMMB 1322 - Remote BACnet I/O Board

Features

- BACnet MS/TP
- 2 inputs and 2 supervised outputs
- 2 override switches to manually control each output
- 120Vac or 240 Vac selectable power input
- 2 auxiliary outputs (24Vdc / 24Vac)

Inputs

Expansion Board (CMMB)

- BACnet MS/TP or Modbus communication (selectable)
- 10 inputs and 10 supervised outputs
- 10 override switches to manually control each output
- LED status indication of each input and output
- DIN rail mounting

Room Thermostat (STLD)

- User Interface fully customizable via Modbus RTU
- Backlit LCD with simple icon and text driven menus
- Built-in temperature sensor
- External temperature sensor input (10 KΩ)
- Selectable Fahrenheit or Celsius scale
- Set Modbus RTU baud rate via thermostat menu (9600, 19200, 38400 or 57600 bps)
- Set Modbus RTU address via thermostat menu or via DIPswitch

NEW

Features

Power & Communication

- 24Vac or 30Vdc supply
- 2 RS-485 communication ports
- 1 Slave RS-485 COM port for connecting slave I/O expansion modules
- BACnet MS/TP or Modbus port (selectable)
- BACnet IP or Modbus TCP/IP port (selectable)
- Select network settings via embedded WEB server

10 Inputs

- 2 binary inputs
- 8 universal inputs
- Supports on-board PWM to analog object converters
- Supports pulse counters with counter reset object

10 Outputs

- 6 digital outputs (supervised)
- 4 analog outputs (supervised)
- Manual override of outputs via local web page

Network Communication

BACnet MS/TP

- MS/TP @ 9600, 19200, 38400 or 76800 bps
- Automatic baud rate detection
- Automatic device instance configuration
- Copy & broadcast configuration to other CMMB modules

BACnet IP

- All IP / Ethernet configuration via on board WEB page
- Display device status including each available data point, in addition to the BACnet object interface.
- Supports DHCP or fixed/static addressing

Modbus

- Modbus @ 9600, 19200, 38400 or 57600 bps
- RTU Slave, 8 bits (configurable parity and stop bits)
- Connects to any Modbus master

Modbus TCP/IP

- Connects to any Modbus master

STRB and SHRB

BACnet Sensors

BACnet Room Sensors

Networkable wall mounted temperature and humidity room sensors

Models

Model	Temp	Humidity
STRB24	Yes	-
SHRB24	Yes	Yes

Inputs

1 Digital
(occ. sensor)

1 Analog
(ext. temp. sensor)

24 Vac/ 24 Vdc

Communication

BACnet
MS/TP

Main Features

- Built-in sensor(s)
 - Temperature (STRB24)
 - Temperature and Humidity (SHRB24)
- External temperature sensor input
- Occupancy sensor input
- BACnet MS/TP @ 9600, 19200, 38400 or 76800 bps
- 10 BACnet objects
- Automatic baud rate detection
- Automatic device instance configuration

SMBR

BACnet Router

Models

Model	Description	BACnet Devices
SMBR1	1-Port Router	Up to 32
SMBR2	2-Port Router	Up to 64

Main Features

- One page, set-and-forget configuration and unique network discovery capabilities minimize installation time
- Up to 32 or 64 BACnet devices without the use of additional line drivers
- DeviceFind™ discovery feature: enables you to discover BACnet devices connected to the router with one push of a button (minimizes time required for successful commissioning)
- Lowest cost per connected MS/TP device
- Lowest response time per connected MS/TP device

- Input voltage 24Vac or 24Vdc

STC8: Duct Mount Temperature Sensor

- High accuracy and stability
- Fast thermal response
- Epoxy encapsulated sensor
- Extended durability
- Resistor/Temperature Curve
 - "G" matched (STC8-11, 10K Ω)
 - "A" matched (STC8-13, 3.3 K Ω)
- Compatible with Nepronic controllers, such as TRO, TFC, EFC and EVC

STC8-11	10K Ω
STC8-13	3.3K Ω
STC80X	Analog

STR1: Wall Mount Temperature Sensor

- Available with 10K Ω or 3.3K Ω thermistor
- High accuracy and stability
- Negative Temperature Coefficient (NTC)
- Compatible with Nepronic products

STR1-11	10K Ω
STR1-13	3.3K Ω

STS3: Wall Mount Thermostat

- Built-in temperature sensor
- Adjustable setpoint with mechanical lock
- Sensor type: 10K Ω or 3.3K Ω
- Scale: Celsius or Fahrenheit

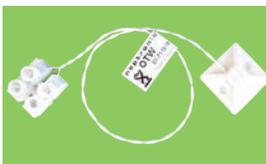

STS3-11F	10K Ω °F
STS3-11C	10K Ω °C
STS3-13F	3.3K Ω °F
STS3-13C	3.3K Ω °C

ITO3: Wall Mount Setpoint Station

- Adjustable setpoint with mechanical lock
- Scale: Celsius or Fahrenheit
- Compatible with STC8-13 duct mounted temperature sensor in installations with Nepronic series duct heaters

ITO3-F	°F
ITO3-C	°C

OTW / SHW: Window Temperature Sensor

- 10K Ω (SHW0-11) or 3.3K Ω (OTW) temperature sensor
- Self adhesive: sticks directly on window
- SHW0-11 compatible with HROB20 humidistats
- OTW compatible with SKR humidifiers

OTW	3.3K Ω
SHW0	10K Ω

STI1-11: Immersion Water Temperature Sensor

- 10K Ω Type III Thermistor
- Immersion type temperature sensor
- High accuracy and stability
- Fast thermal response
- Double encapsulation sensor eliminates moisture infiltration
- Machined 5 Brass thermowell
 - ABS plastic enclosure
 - Quick snap latch
- Hinged cover without screws
- Includes 316 stainless steel 3/4" x 1/2" t-tap fitting

STI1-11	10K Ω
---------	--------------

STP: Strap-On Water Temperature Sensor

- 10K Ω Type III Thermistor
- Designed for fan coil 2 pipe changeover applications
- High accuracy and interchangeability over a wide temperature range
- Sensor's higher resistance output compares to platinum Resistance Temperature Detectors (RTD)
- Sensitive to non-polarity
- Temperature range: -40°C to 150°C (-40°F to 302°F)
- Zinc-plated steel enclosure (STP7-11) or ABS plastic enclosure (STP1-11)

STP7-11	Metal
STP1-11	Plastic

Sensors

Humidity

SHC80: Duct Mount Humidity Sensor

- Duct mounted humidity sensor
- Built-in temperature sensor
- 2 analog outputs (0 - 10 Vdc)
- Can be installed in association with Neptronic room humidistat (HROB20)
- Status LED

Window Temperature Sensor

- 10K Ω (SHW0-11) or 3.3K Ω (OTW) temperature sensor
- Self adhesive: sticks directly on window
- SHW0-11 compatible with HROB20 humidistats
- OTW compatible with SKR humidifiers

SHR10: Wall Mount Humidity Sensor

- Wall mounted humidity sensor
- Built-in temperature sensor
- Plastic cover for wall mount installation
- 2 analog outputs (0 - 10 Vdc)
- Can be installed in association with Neptronic room (HROB20) humidistat or directly to the Neptronic SK300 / SKE Series Steam humidifier (rev 3.3)
- High accuracy and stability

SHH8

- Duct humidistat with on-board setpoint adjustment
- Dust-tight microswitch with SPDT contacts
- Switch between humidify and dehumidify
- Low-voltage operation (24Vac)
- Accuracy: ± 3 or 4% RH

Sensors

Pressure

Model	Pressure Range
SPC 0.1	0 to 0.1" w.c.[25 Pa]
SPC 1.0	0 to 1.0" w.c.[250 Pa]
SPC 2.0	0 to 2.0" w.c.[500 Pa]
SPC 5.0	0 to 5.0" w.c.[1245 Pa]

Features

- LCD Display
- Simple installation and configuration
- Displays actual pressure reading
- Adjustable setpoint and dead band
- Adjustable response speed
- Selectable output signal
- Direct or reverse action outputs
- Fully calibrated
- Real-time pressure output for remote monitoring

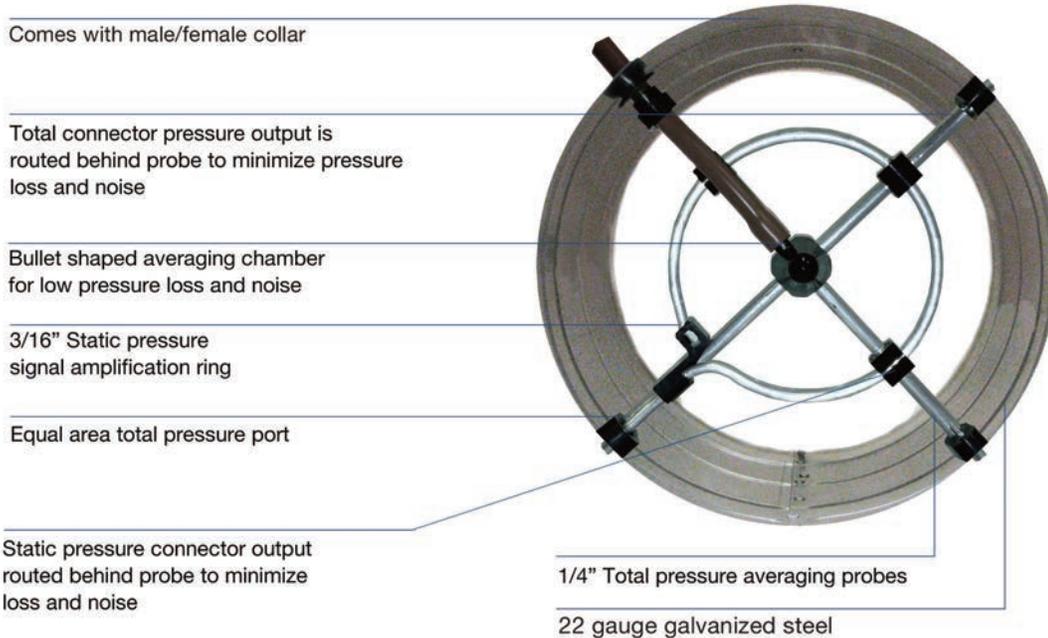

SPD70
(with metal enclosure)

SPD00
(PCB only)

Model	Pressure Range	Enclosure
SPD00-010	0-1" w.c.[250 Pa]	PCB only
SPD70-010	0-1" w.c.[250 Pa]	Metal enclosure
SPD00-020	0-2" w.c.[500 Pa]	PCB only
SPD70-020	0-2" w.c.[500 Pa]	Metal enclosure
SPD00-050	0-5" w.c.[1245 Pa]	PCB only
SPD70-050	0-5" w.c.[1245 Pa]	Metal enclosure

Features

- Small footprint
- Simple and easy to install
- Selectable output signal (0-10 or 2-10 Vdc & 4-20 or 0-20mA)
- High flow impedance in the range of tens to hundreds of kPa

Air Flow Stations

Mechanically amplifies the differential pressure signal making air velocity measurement in VAV boxes possible.

Main Features

- Mechanical amplification of differential pressure signal
- 2 outputs (total pressure and static pressure)
- Advanced design minimizes pressure loss and white noise

Models

Description	CF-06	CF-08	CF-10	CF-12	CF-14	CF-16
Inlet Diameter	6" (15.25 cm)	8" (20.30 cm)	10" (25.40 cm)	12" (30.50 cm)	14" (35.56 cm)	16" (40.64 cm)
Area	0.196 ft ² (0.018 m ²)	0.349 ft ² (0.032 m ²)	0.545 ft ² (0.050 m ²)	0.785 ft ² (0.073 m ²)	1.069 ft ² (0.099 m ²)	1.396 ft ² (0.130 m ²)
Velocity Constant	2812 FPM (14.3 m/s)	2740 FPM (13.9 m/s)	2841 FPM (14.4 m/s)	2822 FPM (14.3 m/s)	2666 FPM (13.5 m/s)	2837 FPM (14.4 m/s)
Velocity Pressure Constant	0.49	0.47	0.50	0.49	0.45	0.50
K Factor	552 CFM (261 l/s)	956 CFM (451 l/s)	1550 CFM (732 l/s)	2216 CFM (1046 l/s)	2850 CFM (1345 l/s)	3961 CFM (1869 l/s)
Amplification Factor F	2.60	2.30	2.30	2.15	2.15	2.10
Total Pressure Ports (ASHRAE Standard 62)	12	12	16	16	20	20
Velocity Range	300 to 3,000 FPM (1.5 to 15.2 m/s)					
Temperature Range	-40°C to 80°C (-40°F to 176°F)					
Materials	Aluminum & PC/ABS					

Actuators

Up to 70in.lb

D-B-S

▶ 35in.lb (4Nm) to 70in.lb (8Nm)

Up to 360in.lb

L-T-R

▶ 140in.lb (16Nm) to 360in.lb (40Nm)

Up to 4000in.lb

U & W

▶ 1800in.lb (200Nm) to 4000in.lb (450Nm)

FAST

B-T-R

▶ Running time of 1.5sec to 30sec

SMOKE DAMPER

BTX-LTX

▶ Rated at 250°F (121°C)

OUTDOOR

IP65

▶ High humidity and outdoor applications

LINEAR

A-M-V

▶ Zone and globe valve applications

Actuated Valves

CONTOURED PORT BALL

FULL PORT BALL

INDUSTRIAL BALL

BUTTERFLY

ZONE

GLOBE

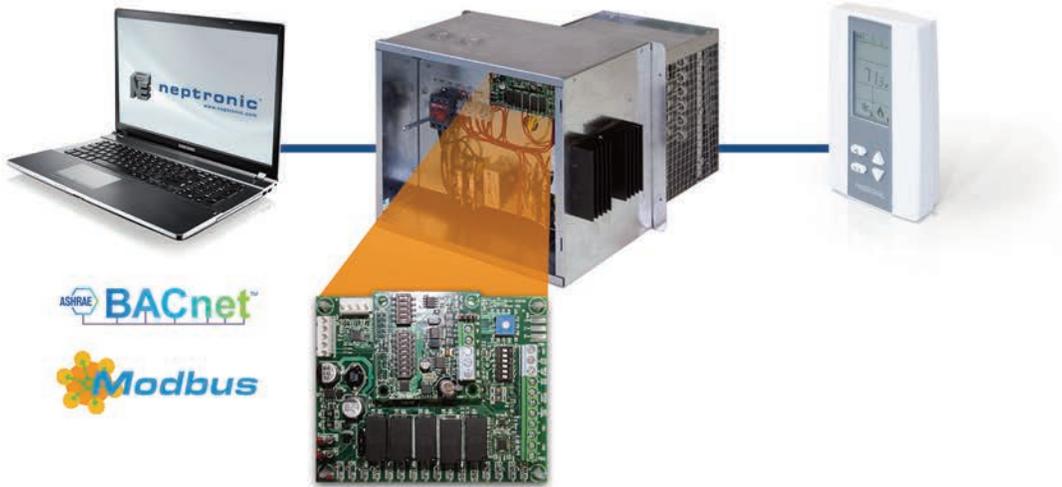

RETRO FIT

HECB Networkable Controller

Benefits

Save Energy

- Embedded and configurable energy conservation strategies
- Automatic or dynamic load shedding
- Limit electric heater consumption based on multiple variables
- Provides real-time temperature measures and power consumption data

Save Time

- View heater status and alarms remotely via network or thermostat
- Remote monitoring (status, alarms, diagnostics, and trending)
- Wall-mount remote user interface (view temperature, setpoint, heater status and alarms)

Integrate

- Integrate with BMS and intelligent buildings via BACnet MS/TP or Modbus
- Multiple BACnet/Modbus points to propel you towards the Internet of Things (IoT)
- Ensure better management of energy consumption for the future

Standard Features

- Accepts any industry standard input signal
- Quick and simple input signal selection via DIP switches
- Modulating, on/off, and/or up to 10 stages
- Real-time feedback output of heater capacity
- Automatic PID
- Remote feedback with TRL54 or TRL24 LCD thermostat (eliminates the use of expensive staged thermostats)
- Zero voltage crossing SSR
- Patented EAS Electronic Air Flow Sensors (US 7,012,223)

Network Communication

- BACnet MS/TP or Modbus RTU (selectable via DIP switch)
- Select MAC address via DIP switch or via network

BACnet MS/TP

- MS/TP @9600, 19200, 38400 or 76800 bps
- BACnet scheduler (up to 6 events)
- Firmware upgradeable via network
- COV (change of value)
- Copy and broadcast configuration to other HECB controllers via menu or network
- Automatic baud rate detection
- Automatic device instance configuration

Modbus RTU

- Modbus RTU @9600, 19200, 38400 or 57600 bps
- RTU Slave, 8 bits (configurable parity and stop bits)
- Connects to any Modbus RTU master

CVC

- 24Vac or 24 Vdc supply
- 2 or 4 SPDT relays (staged or sequenced operation)
- Voltage or current input
- Menu-driven LCD
- Adjustable relay setpoint, hysteresis and activation delay
- Input signal management (loss of signal)
- Displays input voltage or current
- LED status indication of each relay
- Snap Track mounting
- Non-strip, raising clamp terminals

Model	Relays
CVC002	2
CVC004	4

SCC80: Changeover Control Sensor

- 24Vac or 24 Vdc supply
- Sensor operation temperature up to 176°F [80°C]
- Fast response, excellent accuracy
- SPDT output relay
- No adjustments required (pre-calibrated)
- Built-in mounting tabs and mounting screws supplied for easy installation
- Status LED

MEP: Manual Electronic Positioner

- Variable or fixed position controller
- Simple installation
- Wall or panel mounted
- Stainless steel faceplate

MANUFACTURER OF ■

- HVAC CONTROLS
- ELECTRIC ACTUATORS
- ACTUATED VALVES
- HUMIDIFIERS
- ELECTRIC HEATERS
