## Introduction: SHRPLQ

The SHRPLQ series square diffuser provides the building designer with the desired plaque diffuser appearance and superior throw performance. The 24"x24" SHRPLQ has one, two, or three slots with a square plaque face in the center. The removable core offers easy duct and damper access. They feature a 1/4" horizontal lip on the louvered core, resulting in a tight horizontal pattern at the ceiling and a higher discharge velocity at the face. This creates a high induction region just below the face of the diffuser, which makes them an excellent choice for variable air volume systems.

NOTES: Throw values are given for isothermal conditions and terminal velocities of 150, 100, and 50 FPM (0.75, 0.50, and 0.25 m/s). NC values are based on octave band 2 - 7 sound power levels minus a room absorption of 10dB, re 10<sup>-12</sup> Watts. Dash in space denotes a NC or dB value of less than 10. Data was obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70, ISO Standard 5219, and ISO Standard 3741. NOTES: Throw values are given for isothermal conditions and terminal velocities of 150, 100, and 50 FPM (0.75, 0.50, and 0.25 m/s). NC values are based on octave band 2 - 7 sound power levels minus a room absorption of 10dB, re 10<sup>-12</sup> Watts. Dash in space denotes a NC or dB value of less than 10. Data was obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70, ISO Standard 5219, and ISO Standard 3741. See Krueger's selection software for performance data not shown, including octave band data.

**SHRPLQ Suggested Specification & Configuration****SHRPLQ**

The ceiling diffuser shall be Krueger model SHRPLQ (steel) louver plaque face for non-adjustable horizontal discharge airflow. These diffusers shall have a round neck of the sizes and frame style shown on the drawings or job schedule. The backpan shall be constructed with a round neck to accommodate 6" to 14" nominal round duct connections. The SHRPLQ diffuser shall be constructed of 18 gage steel plaque face and 22 gage steel louvered blades and backpan. The diffuser shall have an easily removable core consisting of one, two or three fixed continuous slots with a center plaque face.

**PERFORMANCE**

The manufacturer shall provide published (printed or electronic) performance data for the diffuser. Performance data shall include 2 - 7 octave band sound power levels. The diffuser shall be tested in accordance to the data standards at the time of product introduction or ANSI/ASHRAE Standard 70.

**FINISH**

The paint finish shall be #44 British White and be an anodic acrylic paint, baked at 315°F for 30 minutes. The paint thickness shall be 0.8 – 1.0 mils, gloss at 60° per ASTM D523-89 of 50 – 85%, pencil hardness per ASTM D3363-92A of HB – H, crosshatch adhesion per ASTM D3359-83 of 4B – 5B, impact per ASTM D2794-93 of direct impact >100 in/lb and reverse impact >80 in/lb, salt spray per ASTM B117-9048 of 96 hours, humidity per ASTM D2247-92 of >500 hours and water soak per ASTM D870-92 of 250 hours.
