

# BAS RETROFITS

Do you have an **antiquated** building automation system? **HTS has a solution.**

## REAL SUCCESS AT THE CONGREGATION EMANU EL

The original controls system at the Congregation Emanu El, a prominent synagogue in Houston, TX, was out-of-date and the panels had no drawings or wire labels. HTS designed a brand-new system with a Siemens/Talon front-end and Distech controllers. This **state-of-the-art system** allows for internet dashboards where you can schedule runtimes, create setpoints and monitor your units. By updating their BAS, eliminating their previous maintenance contract and moving to a quarterly system check, **HTS saves the synagogue over \$6,000 per year.**

### CONTACT YOUR LOCAL BAS DEPARTMENT

- CENTRAL TEXAS      randy.jankoski@hts.com
- DFW                      shane.ray@hts.com
- HOUSTON              shane.riley@hts.com

**HTS Texas** offers both Lonworks and BACnet building automation solutions from a single vendor. By utilizing the Tridium Niagara 4 front end, we are able to offer seamless integration solutions for diverse systems and devices – regardless of the manufacturer, or communication protocol – into a unified platform.
