

## CONQUEST GAS CONDENSING WATER HEATER INSTALLATION

The Conquest Gas Condensing Water Heater is a compact, condensing, semi-instantaneous, firetube water heater that combines an advanced fuel-saving design with extended product life.

- Up to 97% thermal efficiency from 40°F to 140°F at full rate
- Part load efficiency up to 99% with modulating models
- Meets ASHRAE 90.1
- Heaters qualify for LEED certification and may contribute to additional LEED points due to efficiency
